4005 Rural Broadband Experiment

Authorized Rural Broadband Experiment (RBE) recipients must address the certification for public interest obligations, provide a list of newly served community anchor institutions, and provide a list of locations where broadband has been deployed.

Public Interest Obligations – FCC 14-98 (paragraphs 26-29, 78)

Please address Line 4001 regarding compliance with the Commission's public interest obligations. All RBE participants must provide a response to Line 4001.

4001. Recipient certifies that it is offering broadband to the identified locations meeting the requisite public interest obligations consistent with the category for which they were selected, including broadband speed, latency, usage capacity, and rates that are reasonably comparable to rates for comparable offerings in urban areas?

Community Anchor Institutions – FCC 14-98 (paragraph 79)

4003a. RBE participants must provide the number, names, and addresses of community anchor institutions to which they newly deployed broadband service in the preceding calendar year. On this line, please respond (yes – attach new community anchors, no – no new anchors) to indicate whether this list will be provided.

If yes to 4003A, please provide a response for 4003B.

4003b. Provide the number, names and addresses of community anchor institutions to which the recipient newly began providing access to broadband service in the preceding calendar year.

**5-Year Service Quality Improvement Plan
47 C.F.R. §54.202(a)(1)(ii) per §54.313(a)(1)
United Utilities, Inc.
United-KUC, Inc.
Yukon Telephone Company, Inc.**

§ 54.202(a)(1)(ii) Submit a five-year plan that describes with specificity proposed improvements or upgrades to the applicant's network throughout its proposed service area. Each applicant shall estimate the area and population that will be served as a result of the improvements. Except, a common carrier seeking designation as an eligible telecommunications carrier in order to provide supported services only under subpart E of this part does not need to submit such a five-year plan.

The receipt of USF support, combined with other funding sources will allow United Utilities, Inc. and its subsidiaries, United-KUC, Inc. and Yukon telephone Company, Inc. (collectively, “UUI”) to continue to provide reliable, state-of-the-art, high-quality service to its rural access lines. UUI operates 63 wire centers throughout rural Alaska with approximately 7,096 access lines. In 2015 UUI received \$7,871,538 in USF support.

UUI provides residential and business landline service as well as private line and last mile facilities via its Incumbent Local Exchange Carrier (ILEC). Of the 63 wire centers operated by YTC, only 5 are reachable by road with the remaining locations requiring air service to reach. Our wire centers serve an average of 115 access lines each with the smallest wire center serving 11 access lines.

Even with the challenging topography and economics, UUI has maintained ILEC facilities to bring voice service to some of the most remote areas in the country. The ILEC facilities are capable of providing local broadband services to these same remote customers including anchor tenants such as schools and clinics. Because our anchor tenants have relied upon voice and broadband service for many years they are already connected and therefore no new anchor tenants were connected in 2015.

UUI works to continually improve, maintain, and repair the facilities within each of its exchanges to enable access for broadband services. The facilities are copper, coax, and fiber. We aim to increase our fiber penetration but also keep our copper in good service in order to allow broadband access.

UUI creates one capital plan for both the parent and subsidiaries. UUI anticipates that it will make the following improvements and/or upgrades to its network over the next five years:

Tribal Engagement Obligation Exhibit

As background, it is important to understand that Congress addressed the land claims of Alaska Natives differently than it did with respect to native land claims in the Lower 48. Alaska claims were settled by Congress in the Alaska Native Claims Settlement Act (“ANCSA”), enacted in 1971. ANCSA divided Alaska into 12 geographical regions, and provided for the establishment of multiple for-profit Alaska Native Village Corporations and a single for-profit Alaska Native Regional Corporation in each region.¹ The Village Corporations own the surface estate of the lands granted to them under ANCSA; each Regional Corporation owns the subsurface estate of the lands granted to the Village Corporations in its region.² ANCSA also granted surface and subsurface lands and other rights directly to the Regional Corporations.³

While there are more than 200 Alaska Native entities included on the list of federally recognized tribes updated periodically by the Bureau of Indian Affairs pursuant to the *Tribe List Act*, the listed entities generally are not the Regional or Village Corporations.⁴ As a result of ANCSA, Alaska Native villages that have been recognized by the federal government – as opposed to the Village or Regional Corporations – generally do not own land. In this respect, Alaska is very different from areas in the Lower 48 where tribes own and have legislative jurisdiction over particular reservation lands.

As the provider of voice and data services to many of these Tribal lands in Alaska, including to Alaska Native regional hospitals, health clinics, and schools, GCI Communication Corp. and its wholly-owned subsidiaries, United Utilities, Inc., United-KUC, Inc., and Yukon Tel. Co., Inc. (collectively referred to as “GCI”), engage in discussions with many Alaska Native representatives regarding their service needs, within the confines, of course, of any applicable E-Rate and Rural Health Care competitive bidding rules. GCI has also established an internal Rural Advocacy Committee to ensure that we are getting information to and receiving information from the rural communities that we serve, almost all of which are Alaska Native villages associated with a federally recognized tribal government. This includes an extensive customer survey program to solicit feedback from tribal communities regarding GCI’s service.

Pursuant to the direction of ONAP, GCI has made a variety of attempts to engage directly with more than 200 federally recognized tribal governments, using the contact information obtained

from the National Congress of American Indians directory, the Bureau of Indian Affairs, or through independent company or tribal contacts. GCI sent representatives to many Alaska Native villages around the state, specifically to engage with tribal council members. In addition, GCI met with members of various Alaska Native villages at conferences, including the Alaska Federation of Natives (“AFN”) annual convention, the Association of Village Council Presidents annual conference, the BIA Providers Conference, and the South West Alaska Municipal Conference. Moreover, while not specifically undertaken for tribal engagement purposes, GCI representatives travel to and interact with Alaska Native communities all over the state, both to educate communities about GCI’s services and to listen to feedback from members of those communities. In addition to visiting large conferences and individual villages, GCI representatives also attended other events in 2015, such as community meetings in Kiana, Buckland, Selwick and Norrvik. A calendar showing much of this travel for 2015 is attached.

GCI has taken steps to address each of ONAP’s five suggested areas of Tribal engagement. That process and these discussions will continue and evolve over time.

1. “a needs assessment and deployment planning with a focus on Tribal community anchor institutions”

GCI has constructed a fiber-optic/microwave middle-mile network in much of western Alaska (“TERRA”), and continues to expand that network, terrestrially connecting rural, tribal communities to Anchorage for the first time. GCI and UUI representatives at all levels of the company have engaged in numerous discussions with residents and leaders of these communities to discuss deployment and services plans and changes resulting from this project, including service changes to the anchor institutions.

GCI and UUI provide service to several Alaska Native Regional Health Corporations throughout the state. For instance, we serve the Yukon-Kuskokwim Health Corporation (“YKHC”), including the regional hospital in Bethel and health clinics in each of the Mobility Fund Phase I communities. Though not a tribal government, YKHC is a Tribal Organization. Elected by the Tribal Councils of each of the 58 federally recognized Tribes in the YKHC service area, the Board of Directors is the chief policy-making body of the corporation, exercising all control, management, and supervision. Each Tribe’s governing council has authorized YKHC to act in its behalf. Within the strictures of the RHC competitive bidding rules, GCI and UUI engage with this tribal organization on a frequent basis.

As mentioned above, we have also engaged in discussions with larger Alaska Native groups, including The Alaska Federation of Natives (“AFN”), which is the largest statewide Native organization in Alaska. Its membership includes 178 villages (both federally-recognized tribes and village corporations), 13 regional Native corporations and 12 regional nonprofit and tribal consortiums that contract and run federal and state programs. AFN is governed by a 37-member

Board, which is elected by its membership at the annual convention held each October. The mission of AFN is to enhance and promote the cultural, economic and political voice of the entire Alaska Native community.

2. *“feasibility and sustainability planning”*

Because rural Alaska is so difficult and expensive to serve and because the population density is so low, technical feasibility and economic sustainability are the challenges to expanding service to small, remote Alaska Native communities. In many informal and formal discussions, GCI has discussed our attempts to improve rural Internet service in comparison with what exists now in the TERRA service area, but also the real microwave technology limitations we had on increasing usage allowances before we got a handle on usage patterns, and what we were doing to help folks manage usage. We have also explained the enormous expense/risk that GCI incurred and continues to incur by building and expanding the terrestrial middle mile necessary to truly improve service.

3. *“marketing services in a culturally sensitive manner”*

GCI are Alaskan companies and make every effort to market services in culturally sensitive manner to ALL Alaskans, including Alaska Natives. We have not yet had discussions on this specific topic with Tribal officials, but have sought feedback.

4. *“rights of way processes, land use permitting, facilities siting, environmental and cultural preservation review processes”*

The unique land ownership realities in Alaska require GCI to engage often with ANSCA Regional Corporations and Federal and State agencies with regard to many land issues, rather than federally recognized Alaska Native tribes. GCI has inquired about any additional frustrations, concerns, or ideas that your communities have with respect to these processes. GCI, of course, provides prior local notice of planned towers consistent with the Commission’s local notice requirements regarding tower siting.

5. *“compliance with Tribal business and licensing requirements”*

GCI is not aware of any business or licensing requirements specific to any federally recognized Alaska Native tribal government and has not heard otherwise from any of the affected tribal governments, but has sought feedback from the tribal governments.
